# Bitcoin Mainnet

Bitcoin on Libre via  
pNetwork.

Libre connects to Bitcoin via  
Lightning and the pNetwork.

PNetwork has integrated Libre  
as one of the 16 chains they  
currently support for their PBTC.

PBTC is [transparent](#),  
decentralized, and censorship-  
free.

PBTC utilizes [PNetwork](#) oracle  
technology which has cross-  
chain liquidity to many other  
chains and is not dependent on  
Libre validators or governance.

The PNetwork Bitcoin bridge  
supports **BTC > PBTC (Libre)** and  
**PBTC (Libre) > BTC**.

[https://dapp.ptokens.io/swap?  
asset=btc&from=btc&to=libre](https://dapp.ptokens.io/swap?asset=btc&from=btc&to=libre)

You can also get your BTC  
deposit address from the API

<https://core-api.libre.org/ptokens/ptoken-wrapping/<account>>"

example: <https://core-api.libre.org/ptokens/ptoken-wrapping/tokyo>

Cross-Chain Interoperability -
