How to Place a Buy Order on LibreDEX

1. Log into your accounts on LibreDEX as shown in [this How-To](#).
2. In LibreDEX select the DEX tab:

#	Name	Volume (USD)	Price (USD)	Price (SATs)	24hr	Libre Holders	BTC Holders	Market Cap (USD)
1	LIBX	\$9,000.39	\$0.0055	640	-5.00%	25	1	\$3,476.842
2	WHIE	\$5,716.63	\$0.1029	589	+0.00%	15	4,973	\$3,907.041
3	GRIN	\$3,400.78	\$3.5201	10000	+0.00%	6	10,817	\$14,705.887
4	VMPX	\$2,591.49	\$0.0501	217	-0.00%	53	6,538	\$6,094.205

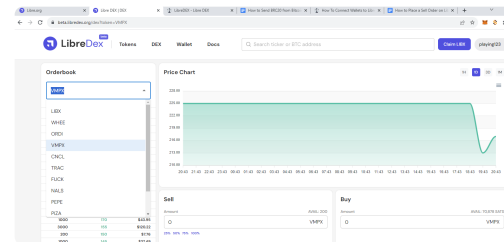

If you have questions about the general layout of the DEX please review [this page](#) of our Docs section.

3. Below "Orderbook" in the top left you can select the dropdown arrow to reveal all of the BRC20 tokens available for trading on LibreDEX. In order to input a Buy order for a BRC20

you will need to select the token that you would like to purchase.

VMPX is being selected for this example. In order to buy tokens you will also need some Sats in your wallet.

4. When buying tokens on the LibreDEX you need to decide if you want to buy tokens for a fixed or limit price in sats regardless of what sellers are offering, or if you want to buy your tokens for whatever price the current sellers are willing to sell for.

If buying at whatever price sellers are willing to pay, the easiest way to populate the Amount and Price fields is to click on one of the red numbers in the order book indicating the various price levels.

5. If we select the 208 value it will populate the Buy order as follows:

6. Since this account doesn't have enough Sats available we need to select a smaller number for the Amount box. For this example the Amount was reduced to 10 VMPX tokens:

9. If you would like to place a buy order but for a price lower than the listed Sell Prices, enter the amount of tokens you'd wish to buy and manually enter a price per token in sats that you'd like to buy for. In this example a bid for 100 VMPX tokens will be listed at a price of 160 sats/token.
