Bitcoin Lightning Network   ⋮

Bitcoin Lightning compatibility with Libre Chain

You don't have to do anything special to send and receive Bitcoin to or from Libre using Lightning when you use the Bitcoin Libre wallet.

Libre has been tested to work with every major Lightning-compatible wallet:

- Muun
- Breez
- Wallet of Satoshi
- Strike
- Chivo
- Phoenix
- Blue Wallet.

Libre seamlessly connects with Bitcoin Lightning Network via Libre's Lightning Providers (LLPs) which provide liquidity

and swaps for PBTC to BTC on Lightning.
