pNetwork

The pNetwork is a secure network of open-source distributed nodes that providce transparent and provable pegging of tokens with interoperability between chains like Bitcoin and Ethereum.

pNetwork built on Libre as well on Polygon, BSC, Telos, Algorand, EOS, XDAI, and Ultra.

If you have an issue with pNetwork, you can get support here on the pNetwork Telegram.

pNetwork Bridge dApp

pNetwork Bridge - this is where you can move your tokens between Libre and other chains. Here are some screenshots:

BTC
